

Transform your everyday business processes with agents

Course MS-4019

Open enrollment: 4 hours

Skills-based instructor-led training course description

This course examines no-code agents in Microsoft 365 Copilot Chat and SharePoint, and it explores how Microsoft 365 business users can create, manage, and use them.

What you learn: Find out how AI-powered assistants provide real-time support, automate processes, and help users navigate complex tasks. Plus, learn how to create, test, manage, share, and use these agents.

Audience profile

This course is designed for Microsoft 365 business users.

Agenda

- Get started with agents
- Build and manage an agent
- Share and use agents
